PROFESSIONAL SUMMARY

.NET Developer with 5+ years of hands-on experience designing and delivering scalable healthcare automation and backend systems using C#, ASP.NET Core, Web API, Azure DevOps, and MySQL. Successfully built and shipped 12+ end-to-end automation tools that reduced manual effort by up to 90%, saving hundreds of operational hours every month. Consistently maintains 95%+ code coverage, takes full SDLC ownership, and thrives in Agile/Scrum environments. Passionate about clean architecture, performance optimization, and building reliable systems that directly impact business outcomes.

TECHNICAL SKILLS

Languages: C#, VB.NET, Python, SQL

Frameworks: .NET 6/7, ASP.NET Core MVC, ASP.NET Core Web API, WinForms, Entity Framework Core, LINQ

Database: MySQL, Stored Procedures, Query Optimization, Database Design

Testing & API: Selenium WebDriver, NUnit, xUnit, Unit Testing, Postman, Swagger/OpenAPI, JSON, XML

Cloud & DevOps: Azure App Service, Azure DevOps, CI/CD Pipelines, Git, GitHub, GitLab, Jira, Docker, Kubernetes

Architecture: OOP, SOLID Principles, Microservices, RESTful API Design, Dependency Injection, Repository Pattern, Unit of Work Pattern, Design Patterns, Async/Await, Clean Architecture, Agile/Scrum, SDLC, Code Reviews

WORK EXPERIENCE

Software Developer | Acurus Solutions (Healthcare IT), Chennai

June 2024 – Present

- Architected and delivered **12+ healthcare automation solutions**, reducing manual effort by **70–90%** and saving hundreds of operational hours every month across multiple business-critical workflows.
- Designed, developed, and deployed scalable **RESTful APIs** using **ASP.NET Core Web API**, significantly improving system integration, interoperability, and data exchange across healthcare pipelines.
- Built robust **automated testing frameworks** using **Selenium WebDriver, NUnit, and xUnit**, achieving and sustaining **95%+ test coverage** while preventing critical regressions across all production releases.
- Led **cross-team code reviews**, coordinated **CI/CD production deployments**, and drove ongoing technical improvements in a fast-paced **Agile/Scrum** environment.
- Deployed and maintained .NET applications using **Azure App Service** and **Azure DevOps CI/CD pipelines**.

Junior Software Developer | Acurus Solutions (Healthcare IT), Chennai

June 2021 – May 2024

- Developed and enhanced healthcare applications using **C#, VB.NET, WinForms, and MySQL**, supporting critical patient data management and multi-department operational workflows at scale.
- Improved application performance by optimizing **LINQ queries and MySQL stored procedures**, reducing processing times by up to **75%** across key modules.
- Owned full end-to-end delivery of assigned modules: **requirements analysis, design, development, unit testing, deployment**, and post-release production support with minimal supervision.
- Collaborated with QA, product, and cross-functional teams in **Agile/Scrum**, contributing to consistently high-quality, on-schedule releases throughout the full **3-year tenure**.

KEY PROJECTS

- Batch Automation System** (C#, .NET 6, MySQL, WinForms | 2022–2023): Cut batch processing time from 2 hours to 40 minutes (3× faster) and eliminated 85–90% of manual effort end-to-end, generating measurable operational cost savings monthly.
- HIM – PALISADES (Patient Management)** (C#, VB.NET, MySQL | 2021–2022): Managed and optimized 10,000+ patient records; improved data retrieval speed by 70% and reduced helpdesk support tickets by 40% through targeted system-level improvements.
- Shipment Generation Tool** (.NET, VB.NET, MySQL | 2023): Reduced the full shipment processing pipeline from 45–60 minutes to under 5 minutes, achieving 98% report accuracy and dramatically improving team throughput.
- RCM Health Plan Report Generator** (VB.NET, MySQL, Excel Automation | 2023–2024): Automated the complete Excel reporting pipeline for revenue cycle management, achieving 90% faster turnaround and a 30–35% improvement in data accuracy.
- Text Request Automation** (C#, Selenium WebDriver | 2024): Eliminated 100% of manual outreach effort by fully automating the patient communication workflow, reducing turnaround time to near zero with zero missed contacts.
- Telegram Keka Attendance Bot** (C#, Selenium WebDriver, Telegram Bot API | 2024): Auto-monitors Keka HR biometric data and pushes real-time check-in/out alerts via Telegram, completely eliminating manual attendance tracking overhead for the team.

EDUCATION & CERTIFICATIONS

B.E. Computer Science – Government College of Engineering, Tanjore

2017–2021 | 80%

Higher Secondary (PCM) – Thanappa Gounder Matric School, Dharmapuri

2015–2017 | 93%

ASP.NET Core MVC Certification – Udemy (2025)

Machine Learning with Python – Coursera (2021)
