PROFESSIONAL SUMMARY

.NET Developer with 5+ years of hands-on experience designing and delivering scalable healthcare automation and backend systems using C#, ASP.NET Core, Web API, Azure DevOps, and MySQL. Shipped 12+ end-to-end automation tools that cut manual processing time by 3-5x across patient management, billing, and reporting workflows, with 95%+ sustained test coverage. Full SDLC ownership from requirements through production support in Agile/Scrum environments. Now targeting a Senior .NET Developer role where I can drive architecture decisions on a product engineering team.

TECHNICAL SKILLS

Languages: C#, VB.NET, Python, SQL

Frameworks: .NET 6/7, ASP.NET Core MVC, **ASP.NET Core Web API**, WinForms, **Entity Framework Core**, **LINQ**

Database: **MySQL**, Stored Procedures, Query Optimization, Database Design

Testing & API: **Selenium WebDriver**, **NUnit**, **xUnit**, Unit Testing, Postman, Swagger/OpenAPI, JSON, XML

Cloud & DevOps: **Azure App Service**, **Azure DevOps**, **CI/CD Pipelines**, Git, GitHub, GitLab, Jira

Architecture: OOP, SOLID Principles, **Microservices**, **RESTful API Design**, **Dependency Injection**, **Repository Pattern**, Unit of Work Pattern, Design Patterns, Async/Await, Clean Architecture, **Agile/Scrum**, SDLC, Code Reviews

WORK EXPERIENCE

Software Developer | Acurus Solutions (Healthcare IT), Chennai

Jun 2024 – Present

- Architected 12+ healthcare automation solutions end-to-end, cutting manual processing time by **3-5x** across billing, reporting, and patient-communication workflows.
- Designed and deployed scalable **RESTful APIs** using **ASP.NET Core Web API**, improving system integration and interoperability across healthcare pipelines.
- Built automated testing frameworks using **Selenium WebDriver**, **NUnit**, and **xUnit**, sustaining **95%+ coverage** with zero critical production defects.
- Led cross-team **code reviews** and coordinated **CI/CD** production deployments in a fast-paced Agile/Scrum environment.
- Deployed and maintained .NET applications using **Azure App Service** and **Azure DevOps** CI/CD pipelines.

Junior Software Developer | Acurus Solutions (Healthcare IT), Chennai

Jun 2021 – May 2024

- Developed and enhanced healthcare applications using **C#**, **VB.NET**, **WinForms**, and **MySQL**, supporting patient data management across multi-department workflows.
- Tuned **LINQ** queries and **MySQL stored procedures**, cutting key report and batch processing times by up to 75%.
- Owned full end-to-end delivery of assigned modules — requirements, design, development, testing, deployment, and post-release support — with minimal supervision.
- Collaborated with QA, product, and cross-functional teams in Agile/Scrum, contributing to consistently on-schedule releases throughout the 3-year tenure.

KEY PROJECTS

- Batch Automation System** (C#, .NET 6, MySQL, WinForms | 2022–2023): Cut batch processing from 2 hours to 40 minutes (3x faster) and eliminated 85-90% of manual effort end-to-end.
- HIM – Palisades Patient Management** (C#, VB.NET, MySQL | 2021–2022): Managed 10,000+ patient records; improved data retrieval speed by 70% and reduced support tickets by 40%.
- Shipment Generation Tool** (.NET, VB.NET, MySQL | 2023): Cut the shipment pipeline from 45-60 minutes to under 5 minutes, achieving 98% report accuracy.
- RCM Health Plan Report Generator** (VB.NET, MySQL, Excel Automation | 2023–2024): Automated the Excel reporting pipeline for RCM; 90% faster turnaround and 30-35% accuracy improvement.
- Text Request Automation** (C#, Selenium WebDriver | 2024): Fully automated the patient communication workflow, eliminating manual outreach and missed contacts.
- Telegram Keka Attendance Bot** (C#, Selenium WebDriver, Telegram Bot API | 2024): Auto-monitors Keka HR biometric data and pushes real-time check-in/out alerts, removing manual tracking.

OPEN SOURCE & GITHUB PROJECTS

- TaskFlowApi** (ASP.NET Core Web API, EF Core, Swagger): RESTful task-management API with Repository pattern, DI, and full CRUD endpoints.
- InventoryLinqDemo** (C#, LINQ, xUnit): Inventory service with LINQ-based filtering/grouping/aggregation and 9 unit tests.
- SeleniumTestAutomation** (Selenium WebDriver, NUnit, CI/CD): Page Object Model test suite with 11 tests and a GitHub Actions pipeline.

EDUCATION & CERTIFICATIONS

B.E. Computer Science – Government College of Engineering, Tanjore 2017–2021 | 80%

Higher Secondary (PCM) – Thanappa Gounder Matric School, Dharmapuri 2015–2017 | 95.42%

ASP.NET Core MVC Certification – Udemy (2025)
